## *Distinguished Educator Fellowship Program*

---

### Program Overview Webinar

The Albert Einstein Distinguished Educator Fellowship Program brings experienced K-12 educators in fields of science, technology, engineering, and mathematics (STEM) to serve an 11-month fellowship appointment in a Federal agency or U.S. Congressional office. The Fellows provide their educational expertise, years of teaching experience, and personal insights to these offices and often are involved in the development or implementation of federal STEM education programs and provide expert views on the development of federal education policies. The AEF program provides professional development opportunities throughout the year in addition to the experiences and unique opportunities provided by the Fellow's host office. The Department of Energy (DOE) manages the AEF program for the Federal government in partnership with other participating Federal agencies that host Fellows. Current participating agencies include the National Science Foundation, the National Aeronautics and Space Administration, and that National Oceanic and Atmospheric Administration. In addition, the DOE sponsors up to four placements in U.S. Congressional offices. Approximately 20-25 fellowships are awarded each year.

**The Albert Einstein Distinguished Educator Fellowship Program is now accepting applications for the 2014-15 fellowship year. Applications are due 5:00pm EST Wednesday December 4, 2013.**

### Webinar

This webinar provides an overview of the Albert Einstein Distinguished Educator Fellowship Program, including detailed information on program benefits, eligibility requirements, how to apply, deadlines and other key dates, the selection process, and on the participant obligations.
